To: Emergency Response Officials, Health Educators and Administrators, Distance Learning
Coordinators, Police, Fire & EMS Officials
RE: **Live Response: A WMD Interactive Discussion Program;**
"Suicide (Homicide) Bombers"

Wednesday 27 September 2006, 2:00-3:00 PM ET.
A FREE, Live & Interactive, Public Domain Satellite Broadcast

1. PROGRAM DESCRIPTION: The National Terrorism Preparedness Institute (NTPI) at St.
Petersburg College (SPC) presents "Live Response". "Live Response" is a 60-minute live
discussion in which a panel of experts explores topics related to Weapons of Mass Destruction
(WMD) consequence management and engages in question and answer sessions with the
program audience.

"Suicide (Homicide) Bombers"

Exactly when a suicide bombing will take place on American soil is unknown. Intelligence and
surveillance are vital for police to safely apprehend suicide bombers and prevent detonation. No
suicide bomber profile exists; however, there is a behavioral profile that may be used to assist
police and other emergency responders in recognizing them. We will look at the advantages of
suicide bombers, pre-incident indicators, and suicide bombing incident response on this edition of
Live Response.

Live Response expert guests welcome viewer questions concerning the Psychological Impact of
Terrorism and invite viewers to call, e-mail, or fax their questions during the broadcast.

EXPANDED WEB SITE DESCRIPTIONS: For this program as available:

Live Response 27 September 2006 *or* *http://dlnets.com/ntpi_27Sep06.htm*

2. TARGET AUDIENCES: The primary target audience includes federal, state, and local law
enforcement, fire service, emergency medical services (EMS), emergency management, and
public works. Secondary audiences for this program include federal, state, and local police
academies, university police, military police/security units, military emergency preparedness
officials, sheriff's offices and public health officials.

3. SPONSORS: Live Response is a recurring bi-monthly videotaped satellite broadcast offering
Weapons of Mass Destruction (WMD) related awareness information to the nation's civilian and
military emergency response communities. Live Response is the product of an interagency
program effort from the Department of Homeland Security (DHS), Preparedness Directorate,
bringing together the Office of Grants and Training (G&T) and PREPnet. Live Response is
produced by the National Terrorism Preparedness Institute, a division of the Southeastern Public
Safety Institute at St. Petersburg College, St. Petersburg, Florida. Additional support is furnished
by the Army National Guard and the US Army Satellite Education Network (SEN) at Ft. Lee, Va.

4. AVAILABILITY: This FREE, public domain, videotaped program will be available as scheduled on C/KU analog satellite downlinks and on the Military/Federal CDV GETN Convergent digital satellite networks. A live web cast will also be available at **http://terrorism.spcollege.edu**   All programs are archived and available for viewing from the website using Windows Media Player. GETN/Convergent digital satellite downlinks are found at selected military and federal installations and at over 300 National Guard locations. Other federal and private satellite networks may also carry this program. In addition, the program may be available to a limited number of non-satellite capable military and federal sites via VTC terrestrial relay. Local site use coordination of satellite downlinks will be required.

5. REGISTRATION: All sites MUST register for this FREE, public domain program to receive satellite coordinates (C/KU) or illumination authentication (GETN/Convergent dishes) and site support materials. Please register on-line at the following web site:

NTPI Registration Site or   http://www.dlnets.com/ComNet1st.htm

If you experience server problems, call the toll free number listed above.

6. Other Administrative Items:

1. **Upcoming Program Dates For Calendar Year 2006:**
